Product Description

Aluminum Anti-Seize Compound is a premium anti-seize lubricant containing no lead or copper for maximum resistance to the most corrosive and extreme temperature environments. It has a non-melting synthetic carrier which depolymerizes and dissipates at temperatures exceeding 400°F without leaving a carbon residue. It reduces friction and lubricates metal surfaces to 2000°F/1093°C, preventing galling and seizing as well offering protection against rust and corrosion.
