FOR IMMEDIATE RELEASE

Econo-Spray® line of powerful plastics processing aids helps maximize productivity

Slide Products economically-priced line of mold releases, cleaner, rust preventive and lubricant offers great value and contains no methylene chloride

Wheeling, IL — Slide Products' Econo-Spray® line helps maximize productivity and properly maintain molds. A great value, the Econo-Spray line is formulated with many of the same ingredients as Slide's more powerful industrial products, yet priced to help the bottom line.

Containing no methylene chloride, no CFC's and no ozone depleting chemicals, the Econo-Spray line of products meets tough standards without sacrificing effectiveness.

The Econo-Spray line includes:

Econo-Spray® 1 is a food approved mold release containing a highly effective, non-paintable silicone fluid in a chlorinated solvent carrier system. It will give an excellent release with all thermoplastics, but is not recommended for polycarbonates.

Econo-Spray® 2 is a paintable release in a chlorinated solvent carrier system. It permits post-decorating of molded parts without prior cleaning.

Econo-Spray® 3 contains a highly effective non-silicone release which is approved as a direct food additive(+) in a chlorinated solvent carrier system. This product is highly paintable, and will permit ultra-sonic welding of molded parts. It affords excellent release of all thermoplastics, but its use is not recommended with polycarbonates.

Econo-Spray® 4 mold release is a widely used release agent in the plastic molding industries and is an effective lubricant that produces a bright finish in wire drawing. It is frequently used as a superior lubricant in powdered metal forming.

Econo-Spray® 5 mold release contains micron-size particles, which are extremely frictionless. When applied, it will not pick up dust or dirt. And it is inert to the most corrosive agents. For injection molding

it is excellent for most plastics, particularly where clarity and deep draw operations are important factors.

Econo-Spray® 6 silicone mold release works efficiently on both cold and hot molds. It is CFC-free and free of chlorinated solvents. Econo-Spray® Silicone imparts a smooth, dry film, which is FDA approved and USDA approved for food machinery.

Econo-Spray® 7 Paintable Mold Release works efficiently on both cold and hot molds. It is CFC-free and free of chlorinated solvents. Econo-Spray® Paintable imparts a smooth, dry film, which is biodegradable. It can be used where parts will be painted, hot-stamped, metalized or otherwise decorated.

Econo-Spray Rust Preventive quickly displaces moisture so you can spray damp metal without drying before spraying. It helps rust removal and is compatible with lubricating oil and greases. *Provides 3 years protection indoors under normal conditions.

Econo-Spray® Mold Cleaner quickly removes silicones, grease, oil and wax build-up on mold surfaces. It is also good for clean-up of non-operating electrical equipment and general degreasing on machinery. Safe on solvent-sensitive plastics.

Econo-Spray® Pin Lube & Grease is a white lithium grease that protects equipment by reducing the friction and sticking that can cause pre-mature wear and hinder productivity. Pin Lube & Grease is ideal for knock-out pins where part marking could be a problem. A heavy-duty grease, it is water resistant, protects against corrosion and works at a wide range of temperatures.

Founded in 1953, Slide Products, Inc., an environmentally conscious manufacturer, makes mold releases, cleaners, rust preventives and more.
