

FOOD CONTACT DECLARATION

SLIDE'S KLENZ, ECONO PURGE, AND PURGE-ATORY ARE PURGING COMPOUNDS, AND THE USE OF THIS MATERIAL IS FOR THE CLEANING OF PLASTIC PROCESSING MACHINES.

We confirm that Slide Klenz (#468), Econo Purge (#473) and Purge-Atory (#470) have been formulated and manufactured in accordance with the compositional requirements of the following food contact recommendations or regulations:

Code of Federal Regulations, issued by Food and Drug Administration (FDA), paragraph 21.

Extraction experiments with test samples made of Slide Klenz, Econo Purge and Purge-Atory have shown that extraction limits specified for use in articles used for packing or holding food during cooking (specification 177.1520(c)3.2a.) were not exceeded.

The adjuvants are cleared according to Part 178 (Indirect food additives) or are generally recognized as safe (GRAS), or are prior-sanctioned food additives.

This declaration is made for the active ingredients used in each of these Slide purging compounds and not for the resin carriers. We use only prime resin, but Slide cannot make any statements related to these resin components.

Effective: November, 2020
