FOR IMMEDIATE RELEASE

Slide Econo-Spray® Pin Lube & Grease is specially formulated for knock-out pins where part marking could be a problem

Water-resistant, white lithium lubricant prevents binding and reduces friction and wear

Wheeling, IL — Slide Econo-Spray® Pin Lube & Grease is a white lithium grease that protects equipment by reducing the friction and sticking that can cause pre-mature wear and hinder productivity. It is ideal for knock-out or ejector pins where part marking is a concern.

Formulated with extremely effective rust and oxidant inhibitors, this NLGI Grade #2 grease can be used on all moving parts such as slides or cams, stripper plates, guide pins, etc. or any place where binding, galling and seizing can occur. It can be used on metals, glass, some plastics, rubbers and more.

A heavy-duty grease, it is water-resistant, protects against corrosion and works at temperatures ranging from -20°F to 400°F. It contains no methylene chloride and has no ozone depleting chemicals.

Founded in 1953, Slide Products, Inc., an environmentally conscious manufacturer, makes mold releases, cleaners, rust preventives and more.
