FOR IMMEDIATE RELEASE**Mold Shield® rust preventive ultra-dry formula now with red indicator dye**

Ideal for overnight protection, Mold Shield is self-cleaning at start-up

Wheeling, IL – Conventional rust preventives may leach out of mold crevices and mark parts, resulting in lost production time and rejected parts. Mold Shield rust preventive, now with a unique, extra-dry spray formula and red indicator dye, delivers a dry mist spray, which will NOT PENETRATE INTO MOVING MOLD PARTS, including ejector pin holes, slides, cams, etc. As a result, Mold Shield will not bleed out and mark parts when molds are put back in service. Red indicator dye makes it easy to determine if the complete mold is protected or if application is incomplete.

Self-cleaning at start-up, Mold Shield is perfect for sealing out moisture and protecting tooled steel overnight, as well as providing up to 2 years protection under normal in-door storage conditions.

It has no ozone depleting chemicals and has a non-silicone, non-wax formulation. Mold Shield also neutralizes fingerprint acids while it seals out condensation. *Protects up to two years under normal indoor storage conditions.

Founded in 1953, Slide Products, Inc., an environmentally conscious manufacturer, makes mold releases, cleaners, rust preventives and more.
