**FOR IMMEDIATE RELEASE**

## **NPT Purging Compound Replaces Multiple Products with a Single Purge**

*FDA compliant purging compound works at temperatures ranging from 160° to 600°F*

Wheeling, IL — The most effective new purging technology developed in decades, N.P.T. eliminates the need for multiple purging products since it effectively operates at temperature ranges from 160-600F. It removes all traces of barrel residue in any plastics processing application in less time and for less cost.

NPT solves the major problem of removing stubborn residue between color or resin changes. The most effective new purging technology developed in decades, N.P.T. consists of concentrated purge pellets that react chemically to heat, quickly and effectively cleaning machinery without extra soak time, excess downtime or lost productivity. The resulting purge is so effective that even resin deposits accumulated over long periods are often removed the first time N.P.T is used. N.P.T. should not be used with acetal or delrin

Easy to use, NPT requires no mixing or preparation time, shortening the clean-up cycle. Just pour the recommended amount directly into the throat of the machine. N.P.T. is so concentrated that less compound --- up to one-half the amount of cracked acrylic - is needed for a complete purge.

N.P.T. is non-hazardous, FDA compliant and free of harsh odors.

Founded in 1953, Slide Products, Inc., an environmentally conscious manufacturer, makes mold releases, cleaners, rust preventives and more.
