FOR IMMEDIATE RELEASE

New food-approved On/Cycle Mold Cleaner works on warm molds

Cleaner helps maximize production by keeping molds in the press during cleaning

Plastics processors now have a better option for maintaining molds used to manufacture food-related items. Newly reformulated On/Cycle Mold Cleaner is now food-approved for these applications.

On/Cycle Mold Cleaner works right at the press on warm molds up to 150F and is approved for indirect contact with food, making it ideal for cleaning warm molds used in the manufacture of food-related items. And since it effectively works on even warm molds, molds can stay in the press during cleaning, reducing downtime and helping to maximize plant productivity.

This multi-purpose cleaner has no chlorinated solvents and easily removes releases, oils, greases and many resinous build-ups before they become problematic. Made from odor-destroying citrus oils, On/Cycle gives off a pleasant orange scent while it cleans. It also will not stain aluminum, has no caustic or acidic compounds and can be used on ordinary soil stains and most painted surfaces. It is available in both aerosol and bulk.

Founded in 1953, Slide Products, Inc., an environmentally conscious manufacturer, makes mold releases, cleaners, rust preventives and more.
