FOR IMMEDIATE RELEASE

PC Polish Cleaner quickly removes stains and deposits and conditions metal

Cleaner protects as it cleans

Wheeling, IL — PC Polish Cleaner from Slide Products can be used on all metal to quickly remove stains, discoloration and deposits.

Originally formulated for molds used in plastic injection molding, PC Cleaner is also a great metal cleaner for tool and die and metalworking shops. It removes oils, dirt and particles to help extend the life of expensive tooling.

PC protects as it cleans, leaving a non-transferring, micron thin film that reduces wear. PC Polish Cleaner does not contain diamond dust and has particle sizes <5 microns. It conditions molds for faster start ups and improved release properties. Regular use reduces the need of all types of internal and external release agents. It can be used on both cold and warm injection molds.

Founded in 1953, Slide Products, Inc., an environmentally conscious manufacturer, makes mold releases, cleaners, rust preventives and more.
