FOR IMMEDIATE RELEASE

New Quick “All-Temperature” Mold Releases formulated to improve productivity

New formulation has no ozone depleting chemicals and dramatically improves speed and process automation

Processors can now dramatically improve productivity with the new, fast-drying formulation of Quick Mold Releases. Eliminating 141B, and replacing it with NPB, the new Quick products rival the fast-evaporating characteristics of 1,1,1 trichlorethylene. Yet, Quick Mold Releases have NO OZONE DEPLETING CHEMICALS and no chlorinated solvents.

An additional benefit of this effective new formulation is a more even spray pattern, so less product is required to achieve a better release.

Quick Releases have an extraordinarily broad temperature range and are available in Silicone, Paintable and Lecithin formulations. Quick Silicone is an UL recognized, file #E90952 all-temperature silicone release. A FDA Approved lubricant, it dries fast on cold and hot molds and has no chlorinated solvents. Its odorless formulation imparts a smooth, dry, non-toxic film.

Quick Paintable is an UL recognized, file #E90952 all-temperature biodegradable release. Non-flammable, it is ideal for use where parts will be painted, hot-stamped or metalized or otherwise decorated. It dries fast on cold and hot molds, has no chlorinated solvents and its odorless formulation imparts a smooth, dry, non-toxic film.

Quick Lecithin is an UL recognized, file #E90952 all-temperature non-silicone paintable release. A FDA Approved non-flammable release, it is biodegradable and odorless. A non-silicone, paintable, all-temperature lecithin release, it dries fast on cold and hot molds and has no chlorinated solvents. Its odorless formulation imparts a smooth, dry, non-toxic film

Founded in 1953, Slide Products, Inc., an environmentally conscious manufacturer, makes mold releases, cleaners, rust preventives and more.
